

Examination report

Stallion: Jakob KCF
 Cat. #:
 Date: 28 February 2015

Lineage: Norbert 444 x Star Beart 411 x Star Rypke 321 x Star Pref*5 Oege 267
Pedigree 100
Kinship %: 18.3% (above average/unfavourable)
DNA tests: Hydrocephaly: non-carrier status
 Dwarfism: assumed non-carrier status*
 Chestnut factor: non-carrier status

* the addition 'assumed' reflects the fact that the test used for this characteristic was a marking test and not a gene test. The possibility of a false reading (both positive or negative) is present, though very small.

Exterior:

Height at withers: 1,68m.

Breeding type: Jakob KCF is a stallion with more than satisfactory breeding type. His head has satisfactory expression. The long neck has a vertical build but is a bit heavy. The stallion has more than satisfactory feathers and coat colour is jet black.

Conformation: Jakob KCF is a well-developed stallion with uphill conformation. The slope of his shoulder conformation is average. The stallion's top line is somewhat tight and back-loin connection is correct. The croup is of more than satisfactory length with the right conformation (slightly sloping).

Legwork: Stance of the forelegs is correct. The stance of the hind legs is a fraction sickle-hocked but the legwork is of good quality. Shape of the feet is correct.

Estimated breeding value exterior:

Reliability%	Breeding type	Conformation	Legwork	Walk	Trot
43%	109	112	108	108	110

Character/personality

reaction to stress	<i>freezes</i>			x		<i>flighty</i>	
concentration	<i>distracted</i>				x	<i>focused</i>	
learning capacity	<i>little</i>				x	<i>much</i>	

Performance Test:

Training report:

On arrival Jakob KCF was rather poorly muscled. This has improved as the test progressed. The stallion demonstrates good work ethics in training and is easy to train, which gives his trainer a very positive feeling.

Walk:

The walk is roomy, regular and powerful.

Trot:

The trot is roomy and powerful. In trot the stallion moves with a lot of balance and suppleness.

Canter:

The canter shows good strides from a powerful hind leg. In canter the stallion moves with an uphill outline.

Riding horse aptitude:

Under saddle Jakob KCF demonstrates very good use of the hind leg in all basic gaits. His movement shows lots of scope with very good balance. In spite of his slightly tight top line the stallion displays great suppleness. He has therefore a great talent for riding horse.

Driving horse aptitude

Jakob KCF is found to have very good trainability in show driving work. Powered by a strong, carrying hind leg he moves in a nice uphill frame. He has satisfactory action in the foreleg with good length of stride.

Test results riding test:

Walk	Trot	Canter	Balance/carriage	Agility	Transitions	Impulsion	Total
8.0	8.5	8.0	8.0	8.0	8.0	8.0	89.0

Test results driving test:

Walk	Trot	Balance/carriage	Agility	Transitions	Impulsion	Total scores
8.0	8.0	8.0	8.5	8.0	8.0	89.0

Test results show driving test:

Use foreleg	Use hind leg	Suspension	Posture	Front	Agility	Impulsion	Total
8.0	9.0	8.5	8.5	7.5	9.0	8.5	93.0

Findings Performance Test:

Jakob KCF has demonstrated a good to very good performance in all three disciplines and has developed very positively in the course of the test.

Final conclusion:

Jakob KCF is a stallion with good-quality lineage which will not contribute to outcrossing. The stallion has a good exterior and has given excellent presentations in the Central Examination. On the basis of these results he will be registered in the Studbook under the name of Julius 486.

Dam report:

Julius 486's dam is the now 8-year-old Star mare Wietske van de Anne Hoeve. Within the context of this examination the dam has not been inspected by the jury. She is a Beart 411 daughter and became Star with a second premium at the age of three. She returned as a 4-year-old and was again awarded with a second premium. She has four registered offspring with Julius 486 being the oldest and the only one who was inspected as an adult horse. Wietske's dam is a Rypke 321 daughter. Wietske has a full sister with the Model predicate. Wietske's granddam is the well-known Oege 267 daughter Jildau. This Preferent mare was also the dam of KFPS stallion Harmen 424.

Advice:

Julius 486 is a strong all-rounder who therefore can be used across a broad spectrum. However, because of his widespread lineage there may be certain restrictions, e.g. in terms of preventing inbreeding. His contribution can be of added value mainly because of his great trainability and excellent use of the hind leg.
